To whom It May Concern,

Reference: Enosh Lartey

As the Education Manager at Kai's Clan, I would like to support Enosh with his college application.

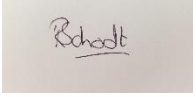

Enosh worked as a student part-time, while he was based in Australia. His teacher, Susan Bowler, introduced us to Enosh and immediately we could see his passion for robotics and coding.

At the time, Kai's Clan was a new product, and Enosh joined and helped us at the RoboCup2019 conference to introduce and engage teachers and students. His role was to showcase the capability of the coding platform and he did that with great enthusiasm and skill.

We also interviewed him to use his testimonial and found him to be very articulate and his knowledge of Computer Science was impressive. I have no doubt he will be successful in any course he enrols with his passion in Computer Science and robotics well noticed in his time with us.

Please contact me if you have any other questions. ronel@kaisclan.ai

Yours sincerely,

Ronel Schodt
Sales and Education Manager
